Objective

I've been coding for close to 4 years now, and about a year ago decided on making front-end my full-time focus. Since then, I've made many personal projects, finished various online courses, and finally created a portfolio that I'm satisfied with. Right now, I feel confident in my current skills and looking for opportunities to use them in a professional setting.

Education

High School

2018 - 2021

Math-Physics-English Course

LXXXVI Liceum
im. Batalionu "Zośka"

Unfinished Bachelor's Degree
